SOC Augmentation with Cado Security

Extensive detection context for SOCs. Better security decisions. Immediately.

Today's SOC teams are tasked with making split second decisions on behalf of entire organizations, often without the full picture. With the Cado Platform, you can level up your SOC team, and give this mission-critical group the information they need at a moments notice, seamlessly integrated directly into your existing systems and workflows.

SOC Augmentation with Cado

Cado Security revolutionizes how SOC teams approach incident response. The Cado Platform supercharges your SOC by reducing the workload during key parts of the investigation workflow, from data capture to root cause analysis. Leveraging AI-powered forensics and actionable insights, Cado Security elevates your SOC's ability to triage incidents and respond with clarity and confidence.

Perform seamless handoff between SOC tier 1, SOC tier 2 and Incident Response teams

Key Benefits of SOC Augmentation

Understand the complete attack. Act with confidence.

Unparalleled Data Acquisition

One the data is gone, it's gone. Act in real-time. The Cado Platform is the only tool with the ability to perform automated full forensic captures as well as utilize instant triage collection methods - native acquisition of cloud-based resources including containers, as well as SaaS applications and on-prem endpoints.

Leading Automated Investigation

Make sense of the chaos. Leading automatic investigation allows you to make sense of the plethora of data and alerts, distilling this down into critical context and key events. Bridging the skills gap and allowing analysts of all levels to make confident decisions.

Respond with Confidence

Act on alerts before they become incidents, and reduce operational risk. The Cado Platform provides SOC teams with the ability to take immediate action to stop threats in their tracks.

Easily Plug Into Existing Tech Stack

No need to rip and replace. Get more out of your existing technology investments, and see immediate value. The Cado Platform augments your existing technology with native integrations. Easily connect different alert sources across cloud and on-prem systems, and connect to destinations such as SIEM, ticketing, and productivity tools.
